

Museum News Update February 4, 2015:

Planning and work is underway to make room at the Museum for a 1965 Chevrolet fire truck kindly donated by the Strasburg Fire Protection District. This truck will be displayed along with our Model T fire truck and 1948 Ford ambulance.

Efforts to complete the restoration of the windmill are progressing nicely. As many will recall, the windmill was severely damaged by hail several years ago. All the wooden parts, including 84 vanes, have been remade. Remaining work includes some further disassembly, sanding and painting, and final reassembly. We are hoping to get the assistance of an Eagle Scout candidate to finish the work in time for a "rededication party" this summer.
